01 Executive Summary

The most critical issue is **comp** indexati

Overall Health Score

Google Indexation		0/20
Technical SEO		5/20
On-Page Optimisation		9/20
Content & E-E-A-T		8/20
Keyword Alignment		7/20

Total: 29 / 100 — The score is low primarily because the site scores 0 on indexation, which carries the highest weight. Once technical blockers are resolved, the effective on-page and content score is ~40/80, meaning significant improvement is also needed in those areas.

Top 5 Critical Issues (Fix in Order)

Issue	Priority	Recommended Fix
JavaScript SPA — site content invisible to Googlebot in raw HTML	CRITICAL	Implement Server-Side Rendering (SSR) via Next.js or add a pre-rendering layer. Without this, Google cannot read any content on the site.
Zero pages indexed in Google — site does not appear in any search result	CRITICAL	Submit XML sitemap to Google Search Console. Request indexation via URL Inspection Tool. Fix JS rendering first — then request re-crawl.
No meta description on any page	CRITICAL	Write unique 150–160 character meta descriptions for each page with primary keyword and a clear benefit. Without them, Google auto-generates poor snippets that hurt click-through rate.
Title tag uses tagline instead of target keyword	HIGH	Change from 'Dhyanora Group Clarity. Direction. Growth.' to 'Business Consulting India Dhyanora Group'. Keywords in title tags are a top Google ranking factor.
No schema markup / structured data detected	HIGH	Implement at minimum: Organization, WebSite, and BreadcrumbList schemas. These help Google understand your business and improve rich results.

02 Google Indexation Status

2.1 Current Indexation

site:dhyanora.com result	0 pages found — site is completely de-indexed / not indexed
www.dhyanora.com/	Page fetches successfully but returns only a title tag in HTML
Cause	JavaScript Single Page Application (SPA) — content only loads after JS execution. Googlebot's first-pass HTML crawl sees nothing.
Impact	No page can rank for any keyword. Zero organic traffic possible.
Time to fix	2–6 weeks depending on chosen solution

2.2 Why JavaScript SPAs Block Google

When Google crawls a standard website, it reads the raw HTML immediately and extracts the title, headings, body text, and links. For JavaScript SPAs, the HTML returned is essentially empty — it only contains a root div and script tags. The actual content is injected later by JavaScript. Google does have a second-pass JS rendering queue, but it is delayed by days or weeks, understaffed compared to the main crawler, and often fails entirely for complex SPAs. The result is that dhyanora.com has no content for Google to index.

2.3 Fix: Choose Your Rendering Solution

Option A — Recommended

Next.js (React SSR/SSG)

Best long-term fix. Next.js renders full HTML on the server before sending to the browser. Every page Google crawls will have complete content in the raw HTML. Supports both SSR (per-request) and SSG (build-time). Effort: 3–6 weeks dev work. Result: permanent fix.

Option B — Quick Win

Prerender.io Middleware

Intercepts Googlebot requests and serves a pre-rendered version without rebuilding the app. Works with any JS framework. Can be set up in days. Effort: 1–3 days. Result: immediate Google visibility, slight maintenance overhead.

Option C — If Budget is Tight

React Snap / Gatsby

Static site generation — renders all pages to static HTML at build time. Works best for sites with limited dynamic content. Effort: 2–4 weeks. Result: very fast site + full indexation.

2.4 Google Search Console Setup (Do This Today)

Google
site, wh
renderin

1. Go to search.google.com/search-console and sign in with your Google account
2. Click 'Add Property' → choose 'URL prefix' → enter <https://www.dhyanora.com/>
3. Verify ownership using the HTML tag method (add the meta tag to your site's <head>)

4. Once verified, go to Sitemaps → submit <https://www.dhyanora.com/sitemap.xml>
5. Go to URL Inspection → paste <https://www.dhyanora.com/> → click 'Request Indexing'
6. Check Coverage report weekly to monitor indexation progress

03 Technical SEO Checklist

3.1 Full Technical Audit Checklist

Check	Finding	Status	Action
HTTPS / SSL	Not verifiable externally	WARN	Confirm SSL active via browser. Check for mixed content warnings in Chrome DevTools. Ensure HTTP → HTTPS 301 redirect is in place.
www → non-www redirect	dhyanora.com → www.dhyanora.com (detected)	WARN	Confirm this is a 301 permanent redirect, not a 302. Pick one canonical version and use it consistently across all internal links.
robots.txt	Not accessible externally	FAIL	Ensure robots.txt exists at dhyanora.com/robots.txt. Must include: User-agent: * / Allow: / / Sitemap: https://www.dhyanora.com/sitemap.xml
XML Sitemap	Not found / not verifiable	FAIL	Create sitemap.xml listing all pages. Submit to Google Search Console and Bing Webmaster Tools immediately.
JavaScript Rendering	SPA — raw HTML has no body content	FAIL	Implement SSR or pre-rendering. This is the root cause of 0 Google indexation. See Section 02 for options.
Viewport Meta Tag	Present: width=device-width, initial-scale=1.0	PASS	Good. Mobile viewport is correctly configured. Maintain this.
Title Tag	Present but not keyword-optimised	WARN	See Section 04 for rewritten title tag recommendations.
Meta Description	Not present in HTML	FAIL	Add unique meta descriptions to every page. See Section 04 for copy.
Schema Markup	Not verifiable via static fetch	WARN	Verify via Google Rich Results Test. Implement Organization + WebSite schema minimum.
Core Web Vitals (LCP)	Likely >4s due to JS bundle load	FAIL	Target LCP under 2.5s. Implement SSR, preload hero image, reduce JS bundle size.
Core Web Vitals (CLS)	Unknown — JS-dependent layout	WARN	Reserve space for dynamic elements with CSS. Run Lighthouse after SSR implementation.
Mobile-Friendliness	Viewport present; full test needs browser	WARN	Test at search.google.com/test/mobile-friendly after fixing JS rendering.
Canonical Tags	Not detected in static HTML	FAIL	Add self-referencing canonical tags to all pages inside the <head> section.
Internal Links	Not detectable — SPA routing	WARN	Ensure all page routes have <a href> links in rendered HTML, not JS-only routing.

Image Alt Text	Not detectable in static fetch	WARN	Ensure all images have descriptive alt attributes. Use keyword-relevant descriptions.
Page Load Time	Not measured — needs browser test	WARN	Run PageSpeed Insights (pagespeed.web.dev). Target under 3 seconds on mobile.

3.2 Required: robots.txt File

Create this file at: <https://www.dhyanora.com/robots.txt>

```
User-agent: *  
Allow: /  
  
# Block admin/private areas if any  
# Disallow: /admin/  
  
Sitemap: https://www.dhyanora.com/sitemap.xml
```

3.3 Required: XML Sitemap Structure

Create this file at: <https://www.dhyanora.com/sitemap.xml>

```
<?xml version="1.0" encoding="UTF-8"?>  
<urlset xmlns="http://www.sitemaps.org/schemas/sitemap/0.9">  
  
  <url>  
    <loc>https://www.dhyanora.com/</loc>  
    <changefreq>weekly</changefreq>  
    <priority>1.0</priority>  
  </url>  
  
  <url>  
    <loc>https://www.dhyanora.com/about/</loc>  
    <changefreq>monthly</changefreq>  
    <priority>0.8</priority>  
  </url>  
  
  <url>  
    <loc>https://www.dhyanora.com/services/</loc>  
    <changefreq>monthly</changefreq>  
    <priority>0.9</priority>  
  </url>  
  
  <!-- Add all pages here -->  
  
</urlset>
```

04 On-Page Optimisation

4.1 Title Tag — Before & After

Current (Before)	Dhyanora Group Clarity. Direction. Growth. [42 chars]
Issue	Tagline uses zero search keywords. No one searches for 'Clarity. Direction. Growth.' — this wastes the most valuable on-page SEO element.
Homepage Fix	Strategic Business Consulting India Dhyanora Group [52 chars]
Services Page Fix	Business Advisory Services for SMEs & Startups Dhyanora [62 chars]
About Page Fix	About Dhyanora Group — Business Consulting Experts India [57 chars]
Contact Page Fix	Contact Dhyanora Group Business Consulting India [51 chars]
Rule	Always lead with the keyword. Keep under 60 chars. Brand name can go at the end.

4.2 Meta Descriptions — Page by Page

Google does not use meta descriptions as a ranking signal, but they directly control click-through rate from search results. A poor or missing description = fewer clicks even if you rank. Write each description to answer: who are you, what do you do, why should someone click?

Homepage	Dhyanora Group helps founders, SMEs, and corporate teams build clarity, find direction, and drive sustainable growth. Expert business consulting in India. Book a free strategy call. [157 chars]
Services	Explore Dhyanora Group's consulting services — strategic planning, operational clarity, and growth advisory for businesses across India. Tailored. Proven. Results-driven. [158 chars]
About	Learn about Dhyanora Group — our mission, our team, and why 80+ businesses across India trust us to guide their growth. Clarity. Direction. Results. [148 chars]
Contact	Get in touch with Dhyanora Group for a free business strategy session. Serving clients across India and globally. No commitment, no hard sell. [147 chars]

4.3 Heading Structure — Required Fix

Currently no heading tags are visible in static HTML due to JS rendering. Once SSR is implemented, every page must follow this hierarchy:

Tag	Usage Rule	Example for Homepage
H1	One per page. Contains primary keyword.	Strategic Business Consulting for Ambitious Companies
H2	Main sections. Secondary keywords.	Our Consulting Services / How We Help / Why Dhyanora
H3	Sub-sections within H2 blocks.	Strategic Planning / Operational Clarity / Growth Advisory
H4	Specific items, FAQs, details.	Who is this for? / What does a session include?

4.4 Canonical Tag — Required on Every Page

Add this inside the <head> of every page, updating the URL to match each page:

```
<link rel="canonical" href="https://www.dhyanora.com/" />

<!-- For the services page: -->
<link rel="canonical" href="https://www.dhyanora.com/services/" />
```

05 Keyword Strategy

Based on the site brand, tagline ('Clarity. Direction. Growth.'), and consulting industry positioning, the following keyword map is recommended. These keywords have strong commercial intent and realistic ranking potential for a new/un-indexed site building authority from zero.

5.1 Primary Keyword Map

Keyword	Monthly Searches (India)	Competition	Intent	Target Page
business consulting India	8,100–12,000	HIGH	Commercial	Homepage
strategic management consulting	3,600–5,400	HIGH	Commercial	Homepage / Services
business advisory services India	2,400–4,000	MEDIUM	Commercial	Services Page
SME consulting services	1,600–2,900	MEDIUM	Commercial	Services Page
business growth consultant India	1,000–2,000	MEDIUM	Commercial	Services / Blog
startup consulting India	1,300–2,400	MEDIUM	Commercial	Services Page
how to scale a business in India	800–1,500	LOW	Informational	Blog Post
business clarity framework	300–600	LOW	Informational	Blog Post
strategic planning for SMEs	500–900	LOW	Informational	Blog Post
Dhyanora Group	Branded	LOW	Navigational	Homepage / About

Note: Monthly search volumes are estimated ranges for India. Verify with Google Keyword Planner or Ahrefs/Semrush before finalising.

5.2 Strategy: Start Low, Build High

As a new/un-indexed site, Dhyanora Group should NOT initially target high-competition keywords like 'business consulting India'. The strategy:

Months 1–2 (Weeks 1–8)	Target LOW competition keywords via blog posts: 'how to scale a business India', 'business clarity framework', 'strategic planning for SMEs'. These rank faster and build authority.
Months 3–4 (Weeks 9–16)	Once the site has 5+ indexed pages, target MEDIUM keywords via dedicated service pages. Focus on 'business advisory services India' and 'SME consulting services'.
Months 5+ (Week 17+)	With domain authority established, begin targeting HIGH competition terms like 'business consulting India' via homepage + link building.

06 Content & E-E-A-T Plan

Google's 2025–2026 core updates have dramatically increased the weight placed on E-E-A-T (Experience, Expertise, Authoritativeness, Trustworthiness). Consulting websites are subject to high E-E-A-T scrutiny because they advise on business decisions — a 'Your Money or Your Life' (YMYL) adjacent category.

6.1 E-E-A-T Scorecard

Signal	Current State	Score	Fix Required
Experience (first-hand proof)	No case studies, no outcomes, no client examples visible	0/10	Add 3+ case studies with measurable results (e.g. '2x revenue in 18 months')
Expertise (credentials visible)	No team bio, no founder story, no credentials page	0/10	Create About/Team page with credentials, years of experience, specialisations
Authoritativeness (recognition)	No backlinks, no press mentions, no directory listings found	1/10	List on Justdial, IndiaMART, LinkedIn, consulting directories. Guest-post on YourStory, Inc42.
Trustworthiness (transparency)	No Privacy Policy, Terms, or contact details visible in static HTML	2/10	Add Privacy Policy, Terms of Service, Contact page with address/phone, and HTTPS confirmation

6.2 Content Calendar — First 90 Days

Week	Content Type	Title / Topic	Target Keyword	Goal
1–2	Page fix	Rewrite homepage with new copy + keyword	business consulting India	Indexation
2–3	Service page	Strategic Planning Services for SMEs	strategic planning SMEs	Indexation
3–4	About page	About Dhyanora Group — Our Story	Dhyanora Group / about us	E-E-A-T
4–5	Blog post	How to Build a Business Clarity Framework	business clarity framework	Traffic
5–6	Blog post	7 Signs Your Business Needs a Strategy Reset	business strategy consulting	Traffic
6–7	Case study	How We Helped [Client] Increase Revenue by 40%	business consulting results India	E-E-A-T
7–8	Blog post	Strategic Planning vs. Business Consulting: What's the Difference?	strategic planning vs consulting	Traffic
9–10	Service page	Business Growth Advisory for Startups in India	startup consulting India	Revenue
11–12	Blog post	How to Scale Your Business in India: 5 Proven Steps	how to scale a business India	Traffic

07 Google Ranking Roadmap

This week-by-week plan takes dhyanora.com from zero Google presence to ranking for target keywords. Actions are sequenced by dependency — each phase unlocks the next.

PHASE 1 — Foundation (Days 1–14)

1

Set up Google Search Console + Bing Webmaster Tools

Create free accounts. Verify site ownership. Submit property. This gives you visibility into crawl errors and indexation status.

Effort: 2–4 hours Owner: Founder / Web Admin

2

Create robots.txt and XML sitemap

Use the templates in Section 08. Upload robots.txt to server root. Generate sitemap.xml with all pages. Submit both to GSC.

Effort: 3–5 hours Owner: Developer

3

Fix title tag + add meta descriptions

Update the homepage title to 'Strategic Business Consulting India | Dhyanora Group'. Add meta descriptions per Section 04. These can go live before SSR is fixed.

Effort: 2–3 hours Owner: Web Admin

4

Add canonical tags to all pages

Insert self-referencing canonical link tags in the <head> of every page. See Section 08 for exact code.

Effort: 1–2 hours Owner: Developer

PHASE 2 — Indexation Fix (Weeks 2–4)

5

Implement Server-Side Rendering (SSR) or Prerender.io

This is the most important technical fix. Choose Next.js for long-term benefit or Prerender.io for speed. Full HTML must be visible in raw page source.

Effort: 1–6 weeks Owner: Developer

6

Verify indexation via Google Search Console URL Inspection

After SSR is live, use GSC URL Inspection on every page. Click 'Request Indexing'. Monitor Coverage report for 'Valid' status.

Effort: 1 hour Owner: Founder / Admin

7

Implement Organization + WebSite schema markup

Add JSON-LD schema to the <head>. See Section 08 for exact code. Verify at search.google.com/test/rich-results.

Effort: 3–5 hours Owner: Developer

8

Set up Google Analytics 4

Install GA4 tracking. Link to Google Search Console. Set up conversion events (form submissions, calls). You cannot improve what you don't measure.

Effort: 2–4 hours Owner: Developer

PHASE 3 — Content & Authority (Weeks 4–12)

9

Launch About/Team page with E-E-A-T signals

Publish founder story, team credentials, company history. Include photos, LinkedIn links, certifications. This directly improves Google's trust in the site.

Effort: 2–5 days Owner: Founder + Designer

10

Create 2 dedicated service pages

One page per service with 600+ words, target keyword in H1, intro para, benefits list, CTA, and FAQ section. Target: 'strategic planning consulting India' and 'business advisory services'.

Effort: 3–5 days Owner: Copywriter + Dev

11

Publish 3 blog posts targeting long-tail keywords

Use topics from the content calendar in Section 06. Each post: 1,000+ words, one primary keyword, internal links, author bio, and a clear CTA at the end.

Effort: 2–4 days Owner: Copywriter

12

Begin link building outreach

Get listed: IndiaMART, Justdial, Clutch.co (free listing), LinkedIn Company Page. Pitch 2 guest posts to YourStory.com or Inc42.com. Even 5–10 quality backlinks dramatically accelerate ranking for a new domain.

Effort: Ongoing Owner: Founder / Marketer

PHASE 4 — Optimise & Scale (Month 3+)

13

Run Core Web Vitals audit via PageSpeed Insights

Test both mobile and desktop at pagespeed.web.dev. Fix LCP issues (image preloading, server response time). Target: LCP <2.5s, CLS <0.1, INP <200ms.

Effort: 1–3 days Owner: Developer

14

Add FAQ sections with FAQPage schema to key pages

FAQs target long-tail voice queries and can earn Google featured snippets. Add 4–6 FAQs to each service page with FAQPage JSON-LD schema.

Effort: 2–4 hours/page Owner: Copywriter + Dev

15

Publish case studies and testimonials

Document 3+ client success stories with metrics. Add structured review markup. Case studies are the highest E-E-A-T signal for consulting sites.

Effort: 1–2 weeks Owner: Founder + Copywriter

16

Monthly SEO review: rankings, traffic, CTR

Every month: check GSC for ranking keywords, CTR, impressions. Update existing content. Identify new keyword opportunities. Track progress against this roadmap.

Effort: Ongoing Owner: Founder / SEO

08 Ready-to-Use SEO Templates

Copy and paste these code snippets directly into dhyanora.com. Update the text in [brackets] with your actual information.

8.1 Homepage <head> Tag Template

```
<head>
  <meta charset="UTF-8" />
  <meta name="viewport" content="width=device-width, initial-scale=1.0" />

  <!-- SEO Title -->
  <title>Strategic Business Consulting India | Dhyanora Group</title>

  <!-- SEO Meta Description -->
  <meta name="description" content="Dhyanora Group helps founders, SMEs,
    and corporate teams build clarity, find direction, and drive sustainable
    growth. Expert business consulting in India. Book a free strategy call." />

  <!-- Canonical URL -->
  <link rel="canonical" href="https://www.dhyanora.com/" />

  <!-- Open Graph (for social sharing) -->
  <meta property="og:type" content="website" />
  <meta property="og:title"
    content="Strategic Business Consulting India | Dhyanora Group" />
  <meta property="og:description"
    content="Expert consulting to help businesses achieve clarity, direction, and growth." />
  <meta property="og:url" content="https://www.dhyanora.com/" />
  <meta property="og:image" content="https://www.dhyanora.com/og-image.jpg" />

  <!-- Twitter Card -->
  <meta name="twitter:card" content="summary_large_image" />
  <meta name="twitter:title"
    content="Strategic Business Consulting India | Dhyanora Group" />

</head>
```

8.2 Organization Schema (JSON-LD)

Paste this inside the <head> or just before </body> on every page:

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "Organization",
  "name": "Dhyanora Group",
  "url": "https://www.dhyanora.com",
  "logo": "https://www.dhyanora.com/logo.png",
  "description": "Strategic business consulting firm helping founders,
    SMEs, and corporations achieve clarity, direction, and growth in India.",
  "address": {
    "@type": "PostalAddress",
    "addressLocality": "[Your City]",
    "addressCountry": "IN"
  },
  "contactPoint": {
    "@type": "ContactPoint",
    "telephone": "[Your Phone Number]",
    "contactType": "customer service",
    "areaServed": "IN",
    "availableLanguage": "English"
  },
  "sameAs": [
    "https://www.linkedin.com/company/dhyanora",
    "https://twitter.com/dhyanora"
  ]
}
</script>
```

8.3 WebSite Schema (Enables Google Sitelinks Search Box)

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "WebSite",
  "name": "Dhyanora Group",
  "url": "https://www.dhyanora.com",
  "potentialAction": {
    "@type": "SearchAction",
    "target": {
      "@type": "EntryPoint",
      "urlTemplate": "https://www.dhyanora.com/search?q={search_term_string}"
    },
    "query-input": "required name=search_term_string"
  }
}
</script>
```

8.4 FAQPage Schema Template (Add to Service Pages)

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "FAQPage",
  "mainEntity": [
    {
      "@type": "Question",
      "name": "What does Dhyanora Group do?",
      "acceptedAnswer": {
        "@type": "Answer",
        "text": "Dhyanora Group is a business consulting firm that helps founders,
          SMEs, and corporations achieve strategic clarity, operational direction,
          and sustainable business growth."
      }
    },
    {
      "@type": "Question",
      "name": "How do I book a strategy session?",
      "acceptedAnswer": {
        "@type": "Answer",
        "text": "You can book a free strategy session by visiting our Contact
          page or clicking the Book a Session button on our homepage."
      }
    }
  ]
}
</script>
```

8.5 Blog Post Title Formulas (SEO-Optimised)

Formula	Pattern	Example
